EDUCATION

B.Tech in Electronics and Communication Engineering   **2022 - Present**
Specialization: Computer Science and Engineering
Bharati Vidyapeeth's College of Engineering

EXPERIENCE

Full Stack Development Summer Training   **Jun 2024 - Jul 2024**
Brain Mentors Private Limited
- Engineered 6+ projects including food delivery & e-commerce apps using React.js, Node.js, MongoDB.
- Collaborated in agile sprints integrating 6+ RESTful APIs, ensuring seamless frontend-backend flow.
- Optimized state management using Context API, boosting responsiveness by 30%.
- Managed version control for 3+ projects with Git, executed Postman testing and deployment practices.

PROJECTS

EazyQuizz Live | GitHub Repository   **Apr 2025 - May 2025**
Tech Stack:TypeScript, React, Supabase(Authentication+Database), Tailwind CSS, Gemini API
- Built a quiz app for GDG Hackathon, where teachers quizzes, students get AI feedback and insights.
- Integrated AI chatbot with Gemini API to provide real-time quiz feedback and explanation.
- Used performance analytics to help students improve their accuracy by up to 30% during testing.

Enactus BVCOE Website Live   **Mar 2025**
Tech Stack: React.js, Tailwind CSS
- Developed a responsive website for Enactus BVCOE with 5+ interactive sections.
- Helped boost online presence and user engagement by 40%.
- Integrated Tailwind CSS utility classes for rapid UI prototyping and consistent modern design.

HealthiMe Live | Admin | GitHub Repository   **Jan 2025 - Mar 2025**
Tech Stack: React.js, JavaScript, MongoDB, Node.js, Express.js, Tailwind CSS
- Built a medical appointment booking app with 3 distinct dashboards for Patients, Doctors and Admin.
- Implemented distinct workflows tailored to each user role for a streamlined experience.
- Enabled 100+ patients to schedule consultations, with doctor approval and admin oversight.

TECHNICAL SKILLS

Programming Languages & Markup: Java,C++, JavaScript(ES6), TypeScript, HTML, CSS
Frameworks & Libraries: React.js, Node.js, Express.js, Bootstrap, Tailwind CSS
Databases: MongoDB, MySQL, PostgreSQL
Developer Tools:Git, GitHub, Postman, Visual Studio Code
Academic Coursework: Data Structures and Algorithms, Database Management System

CERTIFICATIONS

Basics and Data Structures & Algorithms in Java   **Mar 2023 - Aug 2023**
Coding Blocks
- Mastered core and intermediate Java concepts like OOPS, recursion, linked lists, trees and graphs.
- Tackled real-world coding challenges to enhance algorithmic thinking and proficiency in data structures.

ACHIEVEMENTS

- Qualified for **Round 2** in **EY Techathon 5.0 (2024)** among top teams.
- Solved **120+ Leetcode problems** with a **30+** day streak.
- Made **500+ contributions on GitHub** through projects, practicing questions and commits.
- Participated in national hackathons like GDG Hackathon 2025, Flipkart GRID 6.0, Amazon HackOn 5.
